SUMMARY

Disciplined EXTC engineering student with an Honors track in AI/ML, presenting exceptional academic standing (8.68 CGPA) and strong core Python fundamentals. Advanced proficiency in utilizing modular programming concepts, object-oriented principles, data extraction logic, and script debugging. National Finalist at SIH 2025 with proven competence in engineering maintainable, clean code and applying AI tools to accelerate software builds.

EDUCATION

St. Francis Institute of Technology (SFIT), Mumbai <i>Bachelor of Engineering (B.E.) in Electronics and Telecommunication (With Honors in AI/ML) • CGPA: 8.68</i>	2023 – 2027
Shri T.P Bhatia Junior College of Science, Mumbai <i>Class XII (HSC) • Percentage: 68%</i>	2021 – 2023
Oxford International School, Mumbai <i>Class X (ICSE) • Percentage: 95.67%</i>	2008 – 2021

SKILLS

Core Languages:	Python (Advanced Core), C++, Basic Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
Libraries & Automation:	Requests, OS & Sys modules, JSON Processing, String Analysis, External API Integrations
AI Platforms & Environments:	Cursor, OpenAI API, Claude API, Google AI Studio, Git/GitHub, VS Code
Execution Strengths:	Code Debugging, Modular Script Architecture, Structural Workflow Documentation, Agile Core Concepts

PYTHON SOFTWARE ENGINEERING PROJECTS

Nocturne Architecture Music Streaming Player <i>Key Tech: Python, Script Automation, System File Handling, Media Pipelines</i>	Dec 2025
- Engineered a fully functional modular application in Python for automated online music search processing and audio pipeline extraction. - Implemented deep backend data workflows to systematically parse queries, capture remote assets, and handle asynchronous playlist logic. - Wrote modular custom exception handling statements that reduced runtime crashes across local audio devices.	
Multi-Source Automated Data Ingestion Engine <i>Key Tech: Python, HTTP Network Requests, Serialization Patterns, LLM API Automation</i>	Jan 2026
- Developed a lightweight, standalone Python script designed to handle complex HTTP network calls, stream data securely, and clean plain text inputs. - Utilized modular architecture patterns to parse text streams into strongly typed Python lists and dictionaries, serializing them into structured JSON files.	
YouTube URL Filtering Desktop Application <i>Key Tech: Python Core Modules, String Manipulation, Operational Logic Isolation</i>	Dec 2025
- Created a desktop application utilizing Python string-splitting rules to filter network traffic and manage specific content rules. - Separated UI presentation components cleanly from backend computation modules to maximize maintainability.	

CERTIFICATIONS

- Python Programming Core Certification • Software Engineering Job Simulation** (Accenture Nordics) • **Generative AI: The Evolution of Thoughtful Online Search**

ACHIEVEMENTS & LEADERSHIP

Smart India Hackathon (SIH) 2025 – Finalist	National Level Competition
Collaborated within a competitive developer sprint to structure logical code workflows, debug algorithm faults, and fulfill system specs.	
Indian Society of Technical Education (ISTE) – General Secretary	Committee Core Member Position
Managed multi-tiered event milestones, organized development tasks, and coordinated code documentation rules for internal hackathons.
